INNOVATION 2020

The MAX aquabike, and its distinguished design as well as premium ergonomics, offers performance and lightness.

It combines the power from its 5 blades (fixed hydraulic resistance) to the variable resistance from its set of pedals to form a duo of intensity. Ideal for cardio training as well as muscle strenghtening. Its marine quality anodized aluminium 6063 T6 structure makes it a lightweight at 15,9 kilograms.

Handling a lighter aquabike and removing it from the pool becomes easier. The galvanic node reinforces the aquabike protection for usage in all types of waters Barefoot usage, fluidity in spinning and powerful resistance are appreciated elements.

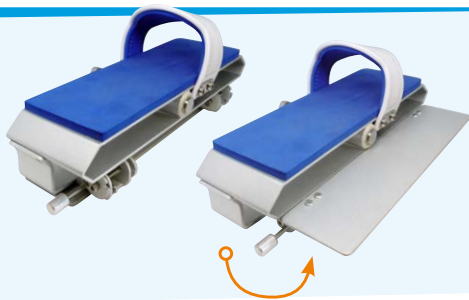

5 BLADES RESISTANCE

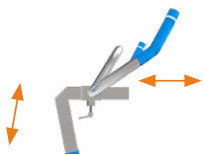

The **5 fixed blades** hydraulic system encased in the crankset offers intensive resistance and workouts destined to **muscle strengthening as well as cardio training**. The effort is simply increased with **pedalling pace**, allowing the user to adapt the type of exercise in an **instant**. **Easy to use** and very efficient, this aquabike is also sought after for its **design**.

Workout intensity can be modified thanks to the new Aqua Double Speed pedals equipped with an open-close flap system.

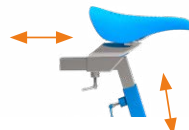

AQUA DOUBLE SPEED PEDALS

Innovation 2020: the ADS pedal is equipped with a flap system destined to **increase resistance level** from the sitting position. Flap closed, enjoy a soft resistance for warm up, flap open and double your effort for a more intensive workout and muscle strengthening. This type of pedal is an essential advantage that will vary your efforts according to your needs of the moment. Compatible with all of our aquabikes.

MULTI-POSITION HANDLEBARS

MULTI-ADJUST SADDLE

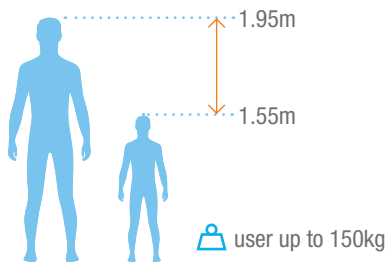

EXPRESS DRAINAGE

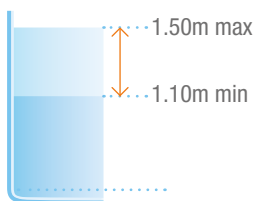

GALVANIC ANODE

ERGONOMICS FOR EVERYONE

ALL POOL TYPES

Quality	Aluminium Tech T6
Finish	Anodisation 15µm
Minimum dimensions	L 55 cm x l 103 cm x H 140/170 cm
Weight	15.9 kg
Water depth	1.10 m à 1.50 m
Warranty	2 years metal parts / 6 months wear parts
Reference	WX-WRMAX1

Certification :

Edition Février 2020
